

Hugo David Noguera Hernández

Bachelor's in Computer Science | Full Stack · Backend · DevOps Developer

Xoxocotlán, Oaxaca, Mexico | +52 954 141 9556 | cdhugo9@gmail.com | github.com/HugoCD20

PROFESSIONAL SUMMARY

Computer Science graduate (UABJO) and full stack developer focused on backend, infrastructure and automation. I have built web systems for public institutions in Oaxaca, covering requirements analysis, design, development, deployment and support. Experience with Laravel, Vue, PostgreSQL, Docker, Nginx, Linux and Keycloak authentication (OpenID Connect/OAuth 2.0). Currently expanding into data analytics, Machine Learning and AI-powered applications. Seeking to join a development team to deliver reliable solutions and keep learning.

TECHNICAL SKILLS

- **Languages:** JavaScript, PHP, Python, SQL
- **Backend:** Laravel, Node.js, REST APIs
- **Frontend:** Vue.js, React, Vite, Tailwind CSS
- **Databases:** PostgreSQL, Redis, pgvector; database design, management and administration
- **DevOps & Infrastructure:** Linux, Docker, Docker Compose, Nginx, Git/GitHub, Cloudflare Tunnel (cloudflared), SSL/TLS
- **Authentication & Security:** Keycloak, OpenID Connect, OAuth 2.0
- **Data & AI:** pandas, NumPy, scikit-learn, OpenCV, YOLO, PyTorch, Power BI, Ollama (local LLMs, embeddings and semantic search)
- **Technical Support & Networking:** Preventive and corrective support, network configuration, maintenance of computers, printers and scanners
- **Office Tools:** Microsoft Office (Excel, Word, PowerPoint)
- **Methodologies:** Scrum, project scheduling
- **Soft Skills:** Adaptability, teamwork, critical thinking, strategic planning, proactivity, self-learning

WORK EXPERIENCE

Software Developer & Technical Support

06/2025 – Present

Tribunal Electoral del Estado de Oaxaca

- Developed and deployed a web system to automate the collection and management of court cases, streamlining the department's internal work.
- Provided preventive and corrective technical support for computers, printers and scanners, resolving user incidents promptly.
- Maintained and configured networks to ensure operational continuity.

Software Developer – Incident Management System

03/2025

Colegio de Bachilleres del Estado de Oaxaca (COBAO), Campus 01 Pueblo Nuevo, Oaxaca

- Developed a web system for incident tracking and management using current technologies.
- Took part in requirements analysis, design, development and deployment of the application.
- Improved the recording, tracking and administration of incidents, increasing the efficiency of institutional processes.
- Helped administer and support a small-scale server.

PROJECTS

- **Document management systems:** full stack applications for document management, authentication, workflows and secure file handling. Stack: Laravel, Vue, PostgreSQL, Docker, Nginx, Keycloak.
- **Computer vision for agriculture:** object detection and image-based crop analysis. Stack: Python, YOLO, OpenCV, PyTorch, ROCm.
- **Local AI semantic search:** experiments with embeddings, LLMs and vector search using open-source models. Stack: Python, Ollama, PostgreSQL, pgvector.
- **Data analytics:** data cleaning, exploratory analysis and visualization with SQL, Excel, pandas and Power BI.

EDUCATION

Bachelor's Degree in Computer Science <i>Universidad Autónoma Benito Juárez de Oaxaca (UABJO)</i>	2021 – 2025
High School Diploma <i>Colegio de Bachilleres del Estado de Oaxaca (COBAO), Campus 40</i>	2018 – 2021

COURSES & CERTIFICATIONS

- **Fundamentos de Machine Learning** – Platzi
- **Backend con Python desde 0** – Udemey
- **Docker: Fundamentos** – Platzi
- **Pagos Abiertos con Interledger** – Platzi

LANGUAGES

Spanish: Native | **English:** Intermediate (B1)
